HOW I WORK WITH AI

MY AI CALLS ME CUCUMBER

I asked for it

02

01 / THE INSTRUCTIONS FILE

ONE LINE

I added one playful line to my instructions file: call me Cucumber at the start of every chat.

- **Guide me step by step.**
- **Keep answers short.**
- **At the start of every chat, call me Cucumber.**

from the file

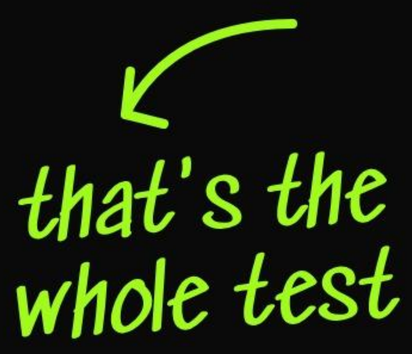

03

02 / THE TEST

IF THE CUCUMBER SHOWS UP

It's a test. If it calls me Cucumber, I know it read my instructions and it's following them.

- **It read my instructions**
- **It's following them**

04

03 / THE SIGNAL

IF IT GOES MISSING

If it suddenly goes missing, something's off: my instructions aren't being applied anymore. That's when I stop.

1. **I stop**
2. **I open a new chat**
3. **Or give it the instructions again**

05

04 / WHY I LOVE IT

IT WON'T TELL YOU

AI doesn't tell you when it stops paying attention. It just keeps working, only differently. Pick your own word, anything works.

- ~~It won't say it stopped listening~~
- **You can tell from the first sentence**

RÉKA VÍG / THE WOW STUDIO

WANT A SECOND LOOK?

If you're building an app with AI and want a second pair of eyes on it, send me a message.
