WHAT I SEE IN AUDITS

THE BUTTON THAT IS JUST DECORATION

Delete account? Nothing.

Swipe →

02

01 / IN AN APP I REVIEWED

DELETE ACCOUNT

An app I reviewed had a Delete account button. I clicked it. Nothing. It was there, it looked good, it just didn't do anything.

- ✓ It's there
- ✓ Looks good
- ✗ Doesn't do anything

it was decoration

03

02 / APPS BUILT WITH AI

INTERFACE DONE

With apps built with AI, it happens that the interface is done and the function behind it isn't.

- **Interface: done**
- **Function: missing**

it happens

04

03 / GDPR, ARTICLE 17

NOT JUST AWKWARD

Under the GDPR, users can in certain cases ask for their data to be erased, and that has to happen without undue delay. If the button doesn't delete, the user thinks their data is gone. It's still there.

Source: GDPR Article 17

- **Button says: deleted**
- **Database says: still there**

not legal advice

05

04 / HOW TO CHECK

TEST ACCOUNT, DELETE

Create a test account, delete it, then look in the database to see if it's really gone. And while you're there, press every button that promises to delete, save or send.

1. **Create a test account**
2. **Delete it with the button**
3. **Database: really gone?**
