FREE HOSTING · CLOUDFLARE

Not whether you take payments. Where the card is typed in.

The one thing Cloudflare's free plan bans.

Swipe →

Commercial use in general.

Cloudflare's main agreement and Developer Platform terms contain **no general ban** on commercial use. A pricing page does pitch the free plan for personal or hobby, non-business-critical projects.

Self-Serve Subscription Agreement · Developer Platform terms

WHAT'S BANNED

Card data on free services.

You may not **process or collect** personal or business payment card data on a web property that receives Free Services.

Self-Serve Subscription Agreement, 2.2.1(h)

WHAT CAN HAPPEN

Suspension, even without notice.

If Cloudflare finds a breach of section 2.2, it can suspend or end all or part of the service, with or without notice.

CHECK YOUR CHECKOUT

Your site or the provider's?

Does the customer type the card on **your** site, or on the **payment provider's**? Card data on your own server or Worker falls under the ban. If AI built your checkout, ask it where card data is handled.

TAKING PAYMENTS?
