WHAT IT IS

Commission Regulation (EU) 2026/909

28 Apr published in the Official Journal, 2026

18 May in force, 2026

12 substances or groups covered

It amends the EU Cosmetics Regulation (EC) No 1223/2009.

BANNED

Triphenyl phosphate

Added to the list of substances prohibited in cosmetic products (Annex II).

NEW OR CHANGED LIMITS

Maximum levels by product type.

Citral

Benzyl salicylate

Zinc salts

Aluminium

Acetylated vetiver oil

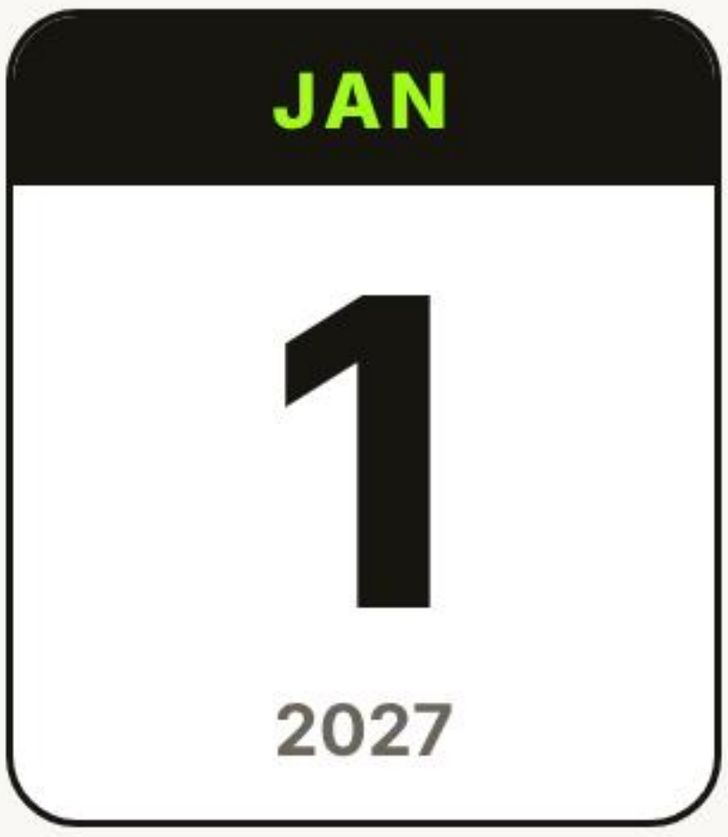

Hair dyes

DHHB

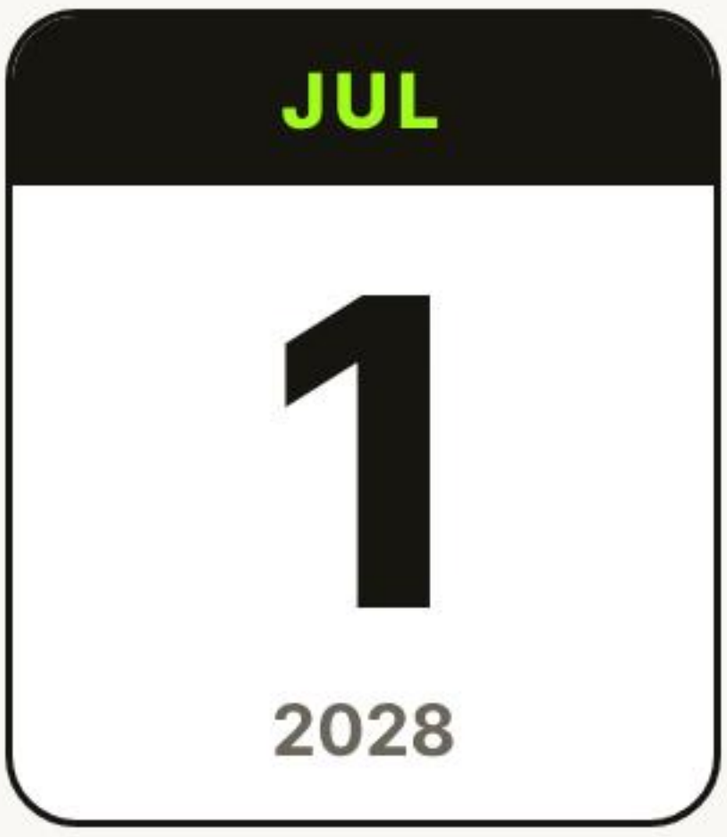

For example, citral and benzyl salicylate now have separate limits for lip make-up, deodorants, fragrance and more.

THE DATES

Two deadlines to plan for.

Non-compliant products can't be placed on the EU market.

They can't be made available in the EU any more.

For some citral entries the second date is 1 August 2028.

YOUR PRODUCT PAGE

Update the page with the formula.

If you reformulate, update the ingredient list as text, so it matches the new pack. Until mid-2028 old and new versions may be on sale at the same time, so make it clear which one a customer gets.

Not legal advice. Check the details with your safety assessor.
