CLIENT PROJECT · SHOPIFY

NO WEBSHOP.

Swipe →

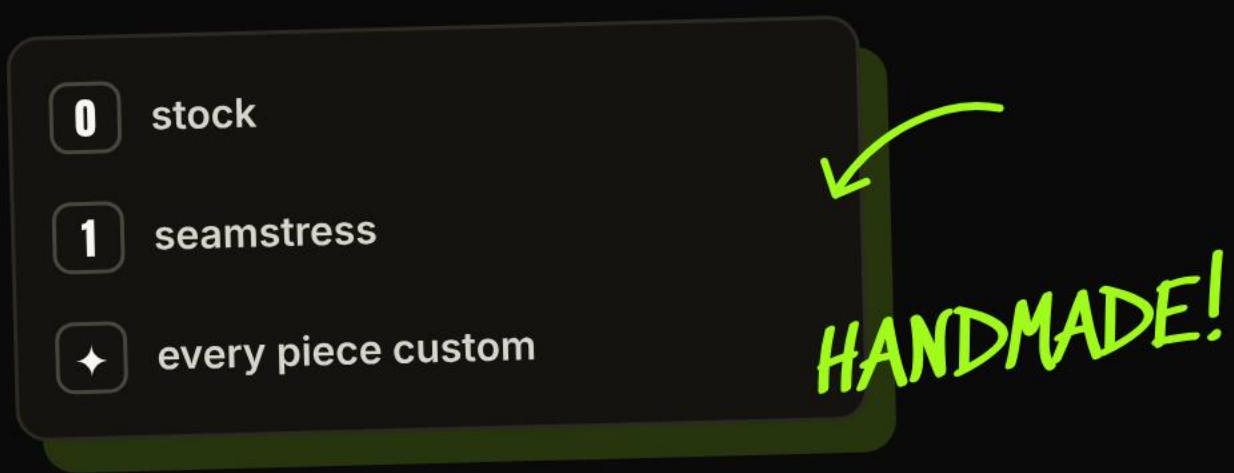

THE SETUP

02

EVERY PIECE *CUSTOM.*

A made-to-order sportswear brand. No stock, one seamstress, and every piece is custom: the cut, the colours, the embroidered lettering.

Our own client project, anonymised

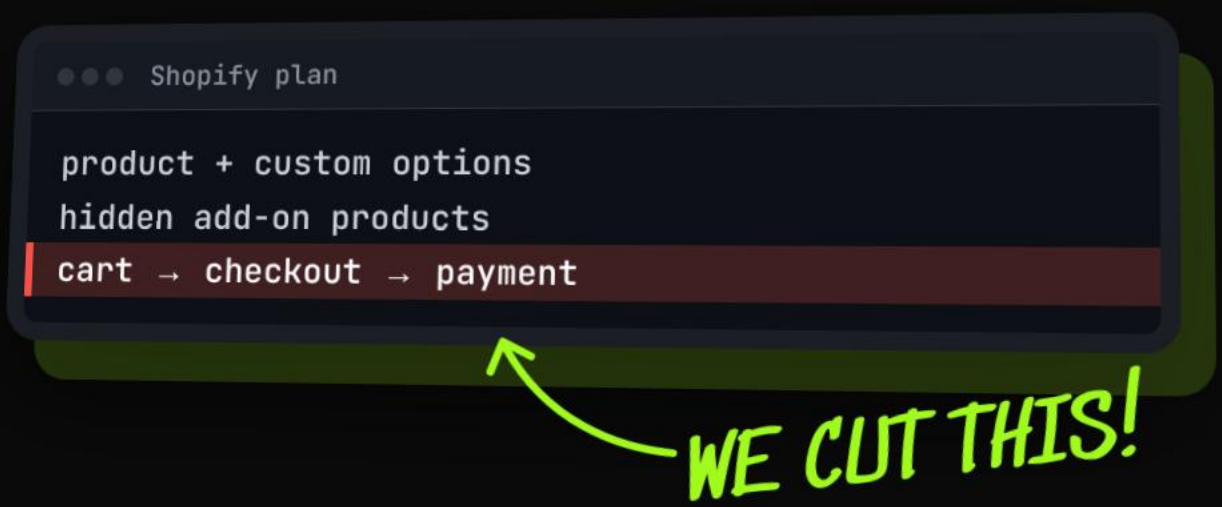

THE FIRST PLAN

03

A SHOPIFY *CONFIGURATOR.*

The first plan was a full Shopify configurator, and we designed it. Then it turned out every order has to be priced and made one by one anyway.

Our own client project, anonymised

PAYING UPFRONT

04

WHERE IT BREAKS.

If the customer pays upfront for a custom piece, you get orders you can't deliver, refunds, and production that can't keep up.

- ✕ Orders you can't deliver
- ✕ Refunds
- ✕ An overloaded seamstress

DON'T!

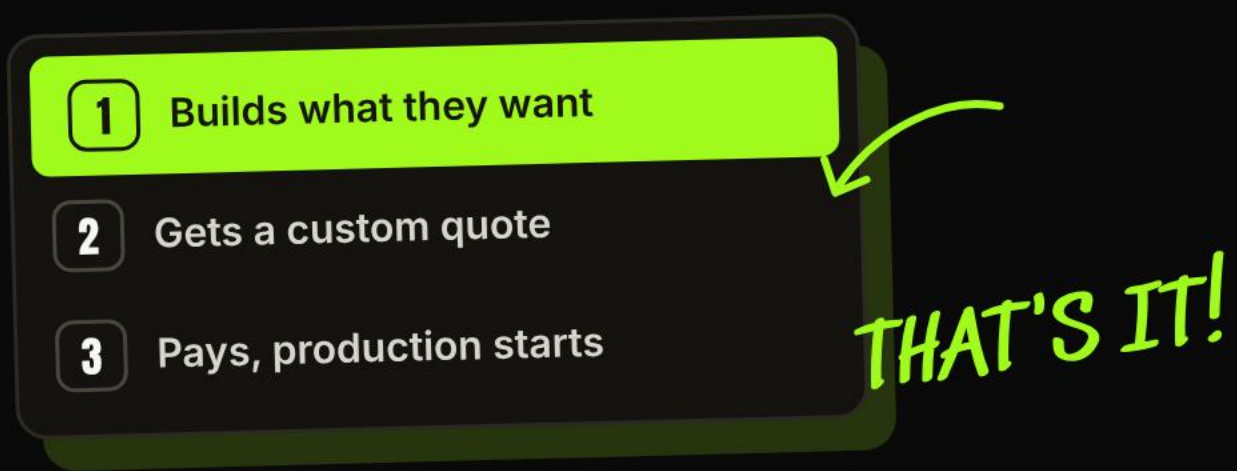

THE FIX

05

QUOTE FIRST, *THEN MAKE IT.*

We built a custom quote-request site. The customer puts together what they want, gets a custom quote, and production only starts once they've paid.

THE LESSON

THE BUSINESS MODEL *DECIDES.*

Not the platform. Shopify is a great tool, but it's not the first step for every brand. What came first for you?
