AI CHAT · COSTS

AI CHAT IN YOUR APP?

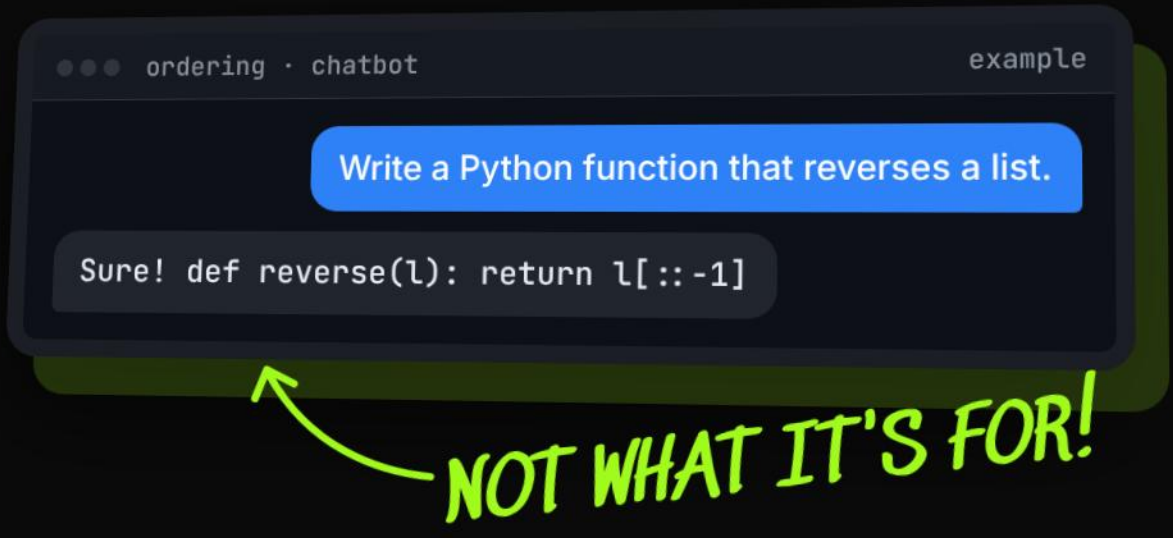

CHIPOTLE · 2026

02

THE CHATBOT WROTE CODE.

People got Chipotle's ordering chatbot to write Python code. A developer built a free coding assistant on top of it, and Chipotle then changed the bot.

YOUR APP

YOU PAY.

03

If your app has an AI chat, anyone can use it for anything, and you pay for every call. According to OWASP, one result is runaway costs.

OWASP Top 10 LLM 2025 · LLM10

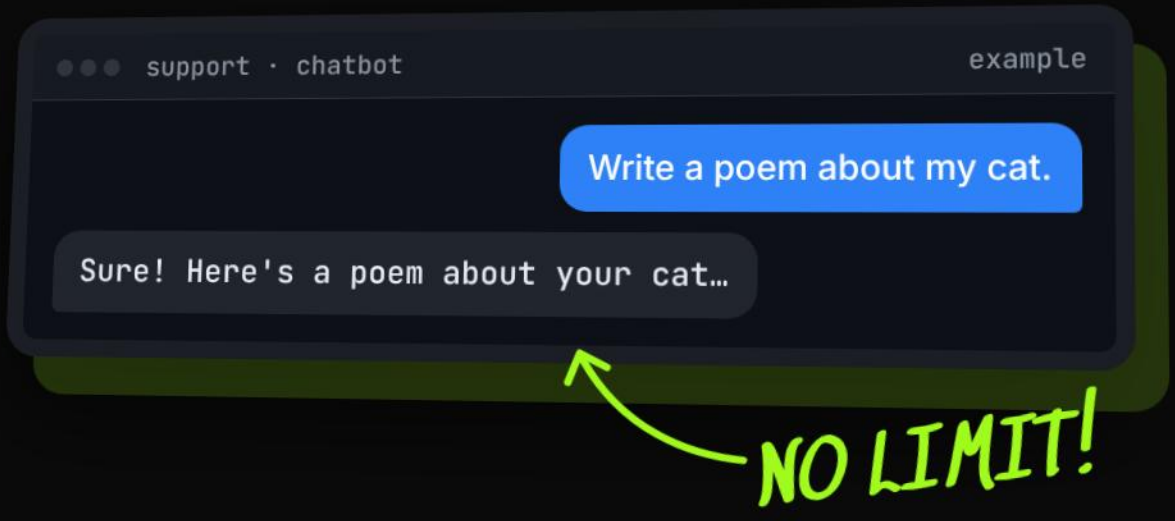

ONLY IN YOUR OWN APP

TEST IT.

04

Ask your bot something completely different from what it's for. If it just answers, there's no limit.

THE FIX

05

LET THE *SERVER* DECIDE.

Don't rely on the bot's instructions alone: let the server decide what the bot can answer and who can call it.

OWASP Top 10 LLM 2025 · LLM10

1. Topic check on the server
2. Who can call it: login
3. Rate limit
4. Usage monitoring

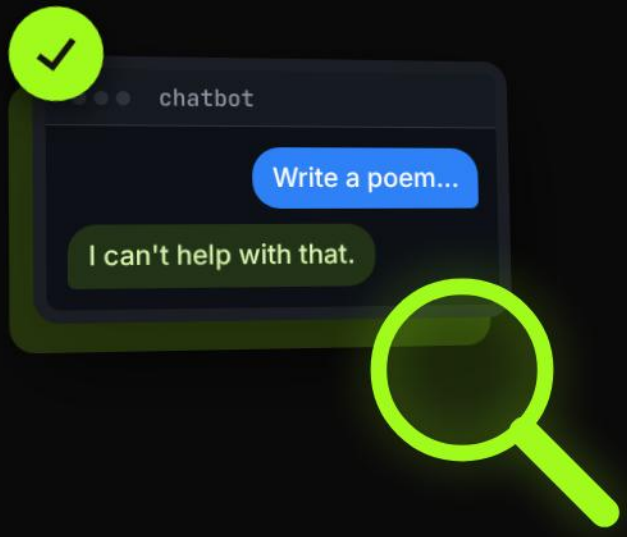

THIS IS KEY!
