CLIENT PROJECT · AI VIDEO

NO PHOTO SHOOT.
STILL A FILM.

Réka Víg | the WOW Studio

THE SETUP

02

NO PRODUCT *YET.*

A new, custom sportswear brand. The site needed an image film, but there was no finished product, no photo shoot and a tight budget.

Our own client project, anonymised

0 finished products

0 photo shoots

✦ tight budget

DAY ONE

THE METHOD

03

IMAGE, *THEN MOTION.*

So we worked with AI. First we generated still images, then we animated them. We ended up with about forty clips, each four seconds long.

Our own client project, anonymised

1. Generate still images
2. Animate them
3. About 40 clips × 4 sec

WITH AI!

ONE CLIP LIBRARY

04

THREE CUTS.

From the same clip library we planned three cuts.

Our own client project, anonymised

1. longer landscape film for the site
2. short vertical teaser for social
3. craftsmanship version

SAME CLIPS!

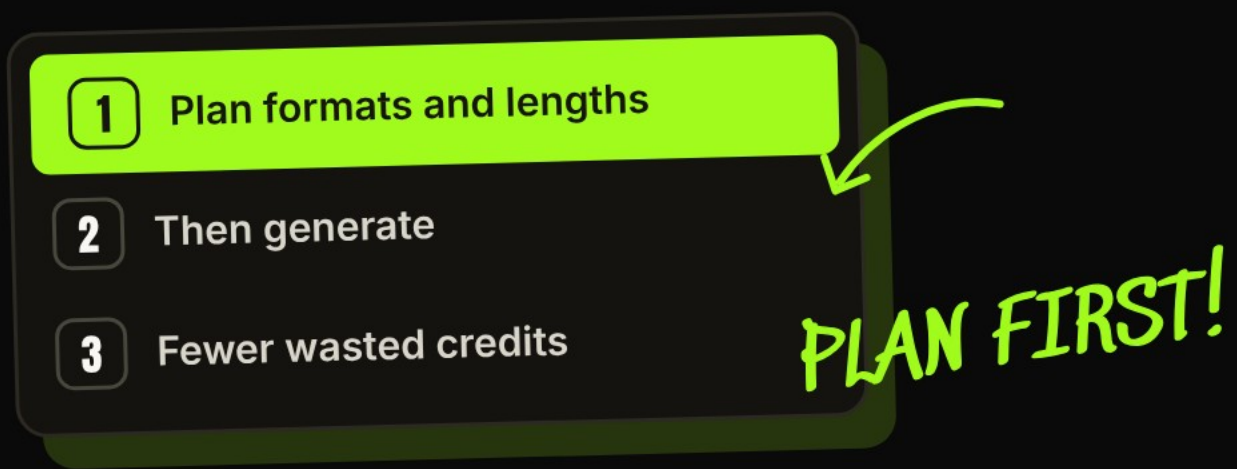

THE LESSON

05

EDIT PLAN *FIRST.*

With AI video, it's worth making the edit plan before you generate. If you know your formats and lengths up front, you burn far fewer credits on clips you'll never use.
